

The Load Swift Loading Platform System

Quick & Efficient Material Load-In

Load Swift International has engineered a unique lifting system using portable cranes in conjunction with rolling lookout platforms.

These high-capacity platforms extend beyond the edge of the building so you can lift your materials directly from the delivery truck to the floor you are working on. Then they roll back into the building for the ultimate in safe lifting.

No need to reach out over the edge to pull the load in. This greatly improves safety

- Chris Vodicka - Safety Manager

Load Swift platforms work in conjunction with tower cranes, Load Swift cranes or conventional cranes - These platforms fit into the system you already use.

No more waiting for Tower Crane availability or skip hoist space

Tom O'Connor - Supervisor

The Load Swift Platform has a working load of over 6000 lbs - suitable for loading drywall, piping, equipment, sheetmetal, electrical, masonry, glass and much more.

When used with the unique Load Swift Beam Hoist or portable cranes, you lift the load directly from the delivery truck to the platform - saving time & money.

Multiple platforms can even "leap-frog" loads - allowing efficient delivery to the upper floors - as high as you desire.

Up to 80% improvement in loading efficiency and 50% reduction in costs

- Bill Thomas - Project Manager

Load Swift Rolling Platform

Rolling Platform Quick-Specs

- Platform Size: 9'6" wide
7'6" long (retracted)
13'1" long (extended)
- Assembled Weight: 5,720 lbs
- Capacity: 11,000 lbs max *

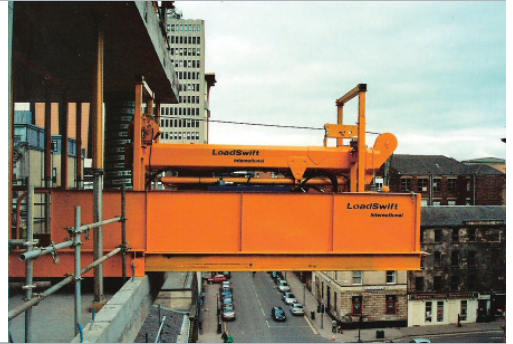

* actual capacity depends on the building and should be determined by a project engineer

Load Swift Beam Hoist

Beam Hoist Quick-Specs

- Footprint Size: 6'5" W x 13'1" L
- Height: 7'8" to 11'7"
- Main Boom: 13' retracted; 19' 6" extended
- Assembled Weight: 8,810 lbs
- Capacity at extended position: 5,500 lbs (not including deductions)
- 3 phase 400-480V; 125 A
